Customer Information on the RoHS Regulation

Dear Customers,

We appreciate your interest in the conformity of our products. The original EC Directive "2002/95/EC (Restriction of Hazardous Substances – RoHS 1)" has been replaced by the EU Directive "2011/65/EU (RoHS 2)."

The "Delegated Directive (EU) 2015/863 of the Commission (RoHS 3)" dated March 31, 2015, introduces amendments and extensions to "Annex II of Directive 2011/65/EU (RoHS 2)" of the European Parliament. The EU Directive "2011/65/EU (RoHS 2)" still remains in force.

Comprehensive restrictions on hazardous substances, as stipulated by Directive "2011/65/EU (RoHS 2)," have been implemented in Germany through the national "Ordinance on the Restriction of Hazardous Substances in Electrical and Electronic Equipment" (Elektro- und Elektronikgeräte-Stoff-Verordnung – ElektroStoffV). This regulation came into effect on April 19, 2013.

MTP Messtechnik Produktions GmbH ensures that its products are manufactured in accordance with their intended use, following the provisions of "ElektroStoffV," as well as "RoHS 2" and "RoHS 3." We actively involve our suppliers in this ongoing process, and all company processes have been and will continue to be adapted to meet the new requirements.

We remain at your disposal for any further information

Yours faithfully,

MTP Messtechnik Produktions GmbH
